

PROPERTY CONDITION DECLARATION

Property Address/Erf No:	Erf 8206 Leslie Street, Platt
Owner's Full Name:	Dick Coxen
Owner's ID:	7810275051089

This Seller's Condition Declaration is made in terms of the Property Practitioners Act, a law which places the responsibility on the Seller to disclose all defects to potential purchasers.

I am the registered owner or representative of the registered owner of the above property and declare to prospective purchasers that, to the best of my knowledge the condition of this property on 1 June 2023 (DATE) was as stated in this Declaration.

- I undertake to disclose in writing to potential purchasers all known defects and agree that such declaration must form part of the legally binding Sales Agreement.
- In some cases, in this Declaration I, the Seller, may have declared that I am unsure of the condition of certain components of the property. In such cases I advise that it is the responsibility of the potential purchasers to make further investigation prior to completing any Agreement of Sale.
- Where I have stated in this Declaration that I am unsure of the condition of the property the Purchaser agrees to absolve both me and my agent of any liability if such component is subsequently found to be defective.

Scope of Seller's Condition Declaration:

- Scope of the Seller's Declaration: This Declaration is made in terms of the Seller's personal knowledge of the condition of the components of the property.
- Meaning of "Defect". A significant safety, functional or structural issue which requires urgent remedial attention to ensure that the structure, or component, remains for its use.
- Nothing prevents a consumer, for his or her own account, from undertaking a private property inspection to confirm the state of the property before finalising the transaction.

Seller's Condition Declaration to prospective purchasers: (Tick applicable blocks)

Note: Where the Property Owner declares "Don't know" in respect of any component of the Property, then the Owner is absolved from any responsibility regarding the disclosure of the condition of that component and the prospective purchaser is advised to conduct an independent investigation of the relevant issue.

1	Are there approved plans for all structures	Yes <input checked="" type="checkbox"/>	No	Don't Know	N/A
2	Roof coverings – any leaks or serious damage	Yes	No <input checked="" type="checkbox"/>	Don't know	N/A

Additional information provided by the Seller regarding defects, or potential defects, to the property as declared on the previous page:

<p>Outside Roof @ pool is not on plan - form needs to be sent in to municipality, to be approved.</p>

Information for the prospective purchaser

The average seller does not know enough about building to accurately declare the condition of the home being sold. Therefore, NABISA recommends that the seller should disclose all significant defects and declare "what they do not know". Such "unknowns" will typically be the condition of the roof covering, roof structure and hot water geyser installation. Diagnosis of the cause and solution of wall cracks and damp are also beyond the knowledge of the average seller.

It is always a wise decision for the prospective purchaser to commission an independent inspection if the seller, or the purchaser, is uncertain about the condition or compliance of any part of the property.

The following issues should be considered when the prospective purchaser is deciding whether to invest in an independent inspection as a condition of the proposed purchase:

- **"Nobody's property is perfect":** The average South African home consists of hundreds of different components and installations, many of which can impact on other parts of the structure. As a result of age, or bad workmanship, defects can be found in most buildings. An experienced and a trained home inspector, who is registered with NABISA, will have a sound all-round understanding of the overall South African built environment. This enables the NABISA registered home inspector to identify and evaluate significant defects observed in structures and, where necessary, recommend further investigation by an appropriate specialist. Such specialists may include, among others: Engineers, (structural, roof or geotechnical), electricians, plumbers, builders, waterproofing, experts, or paint specialists.
- **The National Building Regulations and SA National Standards:** These regulations and national standards are enforced by local authorities when new buildings are to be constructed. These regulations and standards are regularly updated but are seldom retroactive and therefore do not necessarily apply to existing structures, which may have been built years before the relevant regulation or national standard came into force. A good home inspector will evaluate compliance applicable at the time the home was built, evaluate the current condition of the structures, and often also take a view on the anticipated cost of necessary repairs or replacement of components.
- **Certificates of Compliance:** A property may require up to five different certificates of compliance (CoC) before ownership of the property can be transferred to a new owner. These CoC's are:

Electrical, hot water heaters, gas, electrified fence, and "beetle" (wood destroying organisms).
Electrical, electrified fence and gas installation CoC's are required by law for every property transfer.
A plumbing CoC is required after the installation, relocation, or replacement of any electric or solar
water heating system.
